

LRAS1405

50W Passive Special Acoustic Hailing Device

Description

LRAS1405 acoustic hailing speaker can be clearly heard by vehicles 100m away, suitable for remote amplification and emergency weather forecast on the highway; It can be used in special places such as wildlife reserves, chemical plants, power stations, traffic control areas, and airports; All-weather design with a shell made by aerospace industry technology, resistant to acid and alkali as well as salt spray, and can withstand high-strength impact and vibration.

Features

- Rated power 50W
- Voltage input: 70/100V
- High STIPA at 0.8, transmit clear sound
- Transmission distance around 250 meters
- All-weather design, acid and alkali resistance, salt spray resistance, can withstand high strength impact and vibration
- Safer alternative to non-lethal measures, easy to carry, quicker response
- Could be fixed on tripods, small vessels, vehicles and so on
- Beam width (H×V): 90°x60° @2.5kHz/-6dB
- Applied in Police remote warning, strong acoustic dispersal system, emergency rescue, prison guard etc.

Specifications

Model	LRAS1405
Rated power	50W
Voltage Input	70V/100V
Frequency Response	350-10kHz
Max. SPL	128 dB±3
Beam width (H×V)	90°×60° @2.5kHz/-6dB
Transmission Distance	250m

STIPA	0.8
Machine Dimension	295.6×98×269.5 (mm)
Net Weight	5kg
Windproof Level	≥ Level 12
Shell Protection Grade	IP56
